PROFESSIONAL SUMMARY

Computer Science Engineering graduate (CGPA 9.41) from KL University with two internships and expertise in full-stack web development, React.js, Node.js, and Machine Learning. Proven ability to build and deploy scalable web applications, integrated RESTful APIs, and deliver responsive user interfaces. Complemented by five professional certifications including Red Hat, Oracle Cloud Generative AI, and Salesforce Seeking full-time Software Development.

EDUCATION

B.Tech in Computer Science and Engineering 2022 – 2026
KL University, Vijayawada **CGPA: 9.41 / 10**

TECHNICAL SKILLS

Languages	Java, C.
Frontend	React.js, HTML, CSS.
Backend & DB	MongoDB, SQL.
AI / ML	Pandas, Logistic Regression, Random Forest.
Tools & Concepts	Git, GitHub, Data Structures & Algorithms (DSA).

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern Dec 2025 – Apr 2026
Research Seven Consulting Services *VIJAYAWADA*

- Developed and maintained modern, production-grade client-facing web applications using React.js for frontend and Node.js for backend systems.
- Integrated robust RESTful APIs and optimized CRUD operations with databases to achieve completely seamless data flow.
- Collaborated closely with senior engineers on structural UI/UX enhancements, detailed code reviews, and production bug resolutions.

Frontend Developer Intern JUNE 2024 – JULY 2024
Oasis Infobyte *Remote*

- Built highly responsive, pixel-perfect web interfaces utilizing HTML, CSS, and JavaScript with absolute cross-browser compatibility.
- Implemented client-side form validation mechanisms that significantly reduced data input errors and improved user engagement.
- Optimized critical page load performance and systematically maintained design consistency across all independent project modules.

PROJECTS

Inkwell – Online Blogging Platform GitHub

React, Context API, GitHub Pages

- Engineered a full-featured blogging platform featuring end-to-end user authentication, robust dynamic CRUD operations, and category/tag filtering.
- Implemented an intuitive draft/publish publishing workflow, custom pagination, slick toast notifications, and protected routes using React Router.

Heart Disease Prediction System GitHub

Python, Scikit-learn, Pandas

- Designed and deployed an end-to-end machine learning pipeline to analyze and predict heart disease risks by tuning Logistic Regression and Random Forest models.
- Conducted critical data preprocessing, structured feature selection, and clear model performance visualization using Matplotlib.

CERTIFICATIONS

- Red Hat Certified Enterprise System Administrator / Engineer
- Oracle Cloud Infrastructure 2024 – Generative AI Professional
- Salesforce AI Associate
- Aviatrix Multicloud Network Associate
- Automation Anywhere Certified RPA Professional
